

MemberBOSSSM

The 1-stop web solution designed and built to grow membership for community driven organizations.

THE ONE WEBSITE SOLUTION THAT CONNECTS EVENT REGISTRATIONS, MEMBERSHIP MANAGEMENT, ECOMMERCE, EMAIL MARKETING, AND MUCH, MUCH MORE!

MemberBoss is a complete e-business solution that combines state-of-the-art content management, personalization, membership management, e-commerce and automated marketing features that optimize membership marketing campaigns.

memberBoss FEATURES

Content Management

Streamlines the creation and delivery of Web content by empowering content authors to use a Web browser to create, edit, and deploy information on a moment-by-moment basis, with an easy-to-use browser based interface.

Managed Hosting & Open Source

Secure and stable cloud based hosting in the AWS cloud. Open source framework to ensure ongoing compatibility for future development.

Meeting & Registration Management

Powerful meeting registration tools allow you to provide online registrations for your meetings with easy integration for online payment. The registration builds based on the meeting parameters you set for each meeting and comes complete with full reporting and data export capability.

Blog & Social Networking

Build community and site stickiness with blogs by combining text, images, and links to other blogs, web pages, and other media related to the blog topic. Readers can leave comments in an interactive format that can be moderated or not.

E-Commerce and Account Management

Provides robust shopping cart functionality. Empowers a non-technical user to manage, create, and edit online catalog information. Provides tracking of inventory, pricing, promotions, shipping costs, and restock orders.

Asset Resource Library

The online resource library allows you to create and manage a library of assets for your website including images, documents, PDFs, graphics, videos and file downloads for placement on the site by content managers.

Site Membership Management

Provides user and group management services. Maintains a database about all site participants including Members, Content Managers, Site Administrators, and Site Developers.

Group Email Marketing

Enables personalized, selective bulk emailing capability from the c-AMS user database. Track responses, auto recognize visitors, and segregate users for additional marketing capabilities.

Contensive develops websites and online applications with proven tools and techniques. We bring experience, strategy, design and execution to build solutions for our toughest requirements and empower your online dreams.

How can we help you achieve your goals?
